Regarding claim 22, the Examiner asserted that Barkow discloses a deflection yoke for a cathode-ray tube that includes a pair of horizontal deflection coils (saddle-type horizontal deflection coils Fig. 3 ref. 18H) and a pair of vertical deflection coils (vertical deflection windings ref. 18V) for generating magnetic deflection fields perpendicular to a main axis of the cathode-ray tube. One of the pairs includes saddle-shaped coils (the saddle-type horizontal deflection coils referring to Fig. 3 ref. 18H) having conducting wires arranged so as to form a front conductor assembly and a
